

bought 2020 extrusion, 300 long -- one hole is machined
1 x DIA 5.4 across, on the stick's axis, at mid length
the T-slot profile and its DIA 4.2 core are drawn but not
dimensioned: nobody is cutting them
this is the ONE 300 that is drilled: the lid's front rail

Part Material:
Aluminium extrusion 2020, 300 long

General tolerances:
ISO 2768-m

Scale:
1 : 2
